

SPECIFICATIONS

STAINLESS STEEL BLADE

All ERO Vine Trimmer feature a hardened stainless steel blade which is shaped to create suction, removing debris from canopy & sucking small shoots out for the cleanest result.

The razor sharp edge is easily maintained and, being manufactured from 100% hardened stainless steel, it can be sharpened over and over without damage.

IMPACT PROTECTION

Cutter boards with gas shock break-away system prevent damage in event of damage. Boards automatically return into place after breaking away.

LONGEVITY

Designed & built in Germany and then extensively tested in Australasian conditions. All sliding surfaces and pivoting points are bushed for long life and reliability.

MULTI-MASTS

The twin masts operate independently to allow easy operation in contoured rows. Both masts have an internally mounted double acting hydraulic ram.

JOYSTICK CONTROLLER

Control the entire machine from your fingertips with the electronic proportional joystick. Includes emergency stop and rest arm.

CUTTER BOARDS

Adjust each side independently for height, width and angle of individual cutter boards or the whole left or right hand cutter unit. Ideal for terraced/contoured rows.

ERO VINE TRIMMER 'PROFI'

FOR THE OPTIMUM IN VINE TRIMMING

The 'Profi' is the flagship of the ERO Vine Trimmer range, offering huge efficiencies and work rate for large scale vineyards.

The twin hydraulic masts allows the height, width and angle of each side to be adjusted

independently, making operation in varying, contoured or terraced rows simple and easy.

For a clean and fast vine trimming result and the ability to cover very large areas every day, the 'Profi' is the only choice!

PROFI SIMPLE CORDON

For working in wide canopies, ERO has developed the 'Profi Simple Cordon' Trimmer with similar features to the standard 'Profi' but with extra equipment to suit sprawl style canopy.

HORIZONTAL CUTTER BOARD

The Simple Cordon Trimmer features a horizontal top cutter of 1.32mt, allowing the trimmer to vary cutting width up to 1.15mt wide.

ADJUSTABLE LOWER CUTTER BOARDS

Available in single or double knife length, the lower cutters are adjustable in angle to suit the desired canopy shape.

HYD. SHOOT LIFTERS

Hydraulically driven shoot lifters are standard equipment on the 'Profi Simple Cordon'. They rotate, lifting straggling canes and shoots up to the cutter knives.

HYDRAULIC OPTIONS

HYD. ADJUST HORIZONTAL CUTTER BOARD (400MM)

HYD. CUTTING WIDTH ADJUST

MER 'PROFI'

VITICULTURE. IT'S ALL WE DO.

FMR represents some of the world's best-known equipment brands, and we develop our own technology in-house to meet the more specific and often unique requirements of viticulture in Australasia.

As a specialist, we believe in doing one thing and doing it well. That's why our sole focus is on providing viticulturists with the very best equipment for mechanising day-to-day tasks.

Our goal is simple: we want you to do a better job, in less time, for less cost, and enjoy it more.
