

FMR INTER-ROW MOWER GEN II

INNOVATION FOR GROWTH.

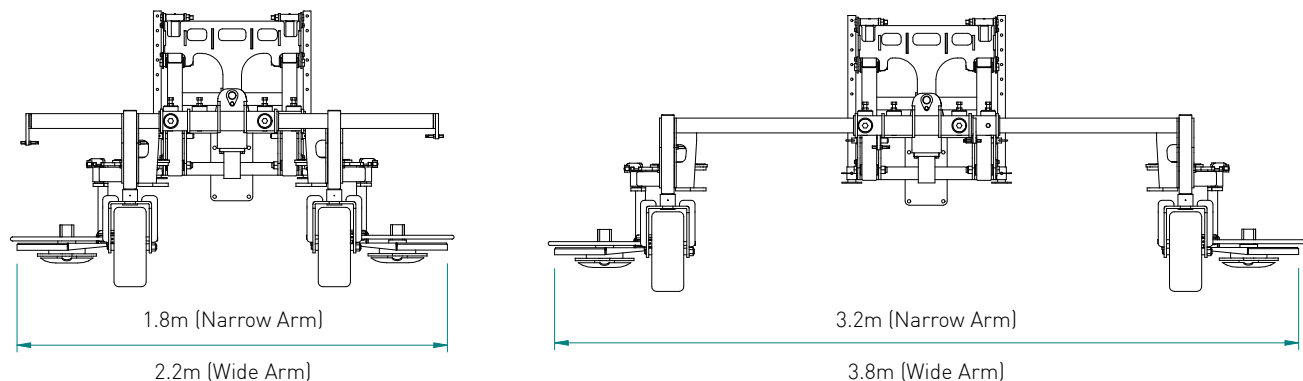

FMR INTER-ROW MOWER GEN II

The FMR Inter-Row Mower Gen II offers the grape grower a robust and efficient solution for control of vegetation in the inter-row zone. Whether you are an organic vineyard with a herbicide free program or just wanting to reduce the amount of chemicals you use in the vineyard the FMR Inter-Row mower is the right choice. The unique parallelogram mowing head system means the mower can operate at an efficient speed while maintaining an excellent cut quality. The contour following frame system and pivoting mower heads allow the mower to operate well in a variety of conditions.

STANDARD EQUIPMENT AND FEATURES:

- Twin 500mm mower heads with anti-scalp discs
- ERO front mounting system
- Hydraulic width adjust from 1.8m rows to 3.2m
- Hydraulic height adjust
- Override on individual heads
- Only single set of remotes required
- Solid filled ground wheels
- Centre pivot on frame for contour following
